

Dear FCCI am in support of the Proposed Rulemaking based upon the indecency issues and in order to improve the Commission's complaint process and better enforce same. I support recording all broadcast material not only from 6 am and 10 pm but for 24 hours. This would ensure any attempts for a station to use the hours after 10 pm to broadcast any programs that may contain indecent material. All stations would use a standardized recorder available thru broadcast suppliers. These recorders should be very basic to get the job done at an affordable price. The recorders must be at all broadcast stations. The retention period should be 90 days. I also support the proposed retention requirement for all digital television and radio stations.
